

Preserving beauty and
enhancing light
as only 3M can.

3M™
Window
Films

3M *Innovation*

A clearly better way to bring light into your home.

Now the light that fills your home can be just the way you want it. Clear, neutral, colored, protective—3M™ window film products make natural light a beautiful and welcome addition to your home.

For more than 40 years, 3M has been a leader in improving light with window films. You can rely on us to help protect your family and furnishings against ultraviolet rays, severe weather and vandalism—all while providing you with comfort from heat and glare.

You've invested so much time and energy into making your home beautiful and inviting. Now you can be sure it stays that way with 3M and our authorized window film dealers. Trust 3M to enjoy your light, your way.

Protect your investment.

Fabrics, wallpaper, natural wood floors, photos and other valuables will fade when unfiltered sun shines through your windows. Fading is caused by a combination of ultraviolet rays, visible light and solar heat. 3M window films are designed to reduce the effects of solar heat and visible light on your furnishings and will block 99 percent of the sun's harmful ultraviolet rays, which are the single largest cause of fading.

Save money.

3M window films also allow you to save money and enhance the comfort of your home all year round by reducing your air conditioning and heating costs. Our films help reduce up to 78 percent of the sun's heat that comes through the window by reflecting it away from your home.

Ensure your peace of mind.

Not only do our window films protect your home's interior, they also help to protect your family against skin cancer caused by daily UV exposure and reduce the amount of glare on TV and computer screens that comes into your home through your windows.

The Skin Cancer Foundation recommends many 3M Window Film products as effective UV protectants.

Your shield for better safety, security and accident prevention.

Keeping your family and home out of harm's way is our window film's first, and most important, task. The impact of unwelcome elements like severe weather, vandalism and ultraviolet rays, are all reduced with 3M window films.

In destructive weather, one of the greatest dangers to your family is the threat of flying broken glass. All our window films help hold the glass in place to aid in the prevention of flying glass and dangerous shards.

3M window film helps deter burglars by eliminating their most crucial weapon...time. Burglars who smash glass in windows or doors rely on quick and easy access for a successful break-in. A door or window that slows them down is one that will probably make them go away.

Our film also helps reduce damage and injury from indoor accidents such as children running into or throwing things at glass doors and windows.

3M Window Films

Another great
3M product
you can trust
in your home.

3M invented window films.

No one has more experience with window film. In 1966, we received the first patent for window film. Today there are millions of square feet of 3M window films installed all around the world.

3M is the world leader in window films.

For decades, 3M has been the world leader in the development of new and innovative adhesives. We have the finest selection of window films that resist peeling, bubbling, scratching and abrasion for long-lasting beauty and clarity.

3M window films are installed by authorized dealers.

3M window films are sold and installed exclusively by professional, authorized 3M dealers. To ensure quality workmanship, the people who install your film are professionally trained by 3M personnel.

3M stands behind its products.

Selecting 3M window films gives you peace of mind. That's because we have one of the most comprehensive warranties you can get. 3M window films are backed by a limited-lifetime warranty should your window film need replacing.
